123CarePhone

The Care Phone with SOS that just works!
No Line, Internet or WiFi required

Introduction

123CarePhone is a long-awaited solution in the UK Telecoms industry for the care sector and occupational therapy teams who need a simple to use phone which is not dependant on the mainstream UK Analogue phone network, working broadband, WiFi or Electricity.

At its heart, **123CarePhone** uses the mobile phone network for connectivity. It does not require Line Rental, Internet or WiFi. Furthermore, **123CarePhone** includes embedded battery backup and can work for up to 5 hours without mains electricity.

123CarePhone also includes easy to recognise “Photograph Speed Dials”, an extra large keypad, an SOS button, an additional 40db sound amplifier. There is also an optional SOS wrist strap which triggers the SOS button remotely.

123CarePhonePlus offers smart additional services such as such as instant remote management of the the SOS button action and destinations, call screening, call recording and on-line monitoring and alerting if the phone goes offline.
