

# KONTACTABLE *Resilience*

## The UK's First 'Always-On' VoIP Desk Phone

### Never Lose Office Phone Connectivity Again

**Resilience** from 123Telecom is the UK's first 'Always-On' VoIP desk phone, offering seamless connectivity via Wired Broadband, Wi-Fi and Mobile SIM Card.

Built on world-leading, proven Yealink hardware, **Resilience** automatically switches to mobile data the moment your primary internet goes down, keeping your business fully operational. Once your internet is restored, **Resilience** automatically flips back to your regular wired or Wi-Fi network—no manual intervention required.

### Powered by Our Embedded Quad-Network

To guarantee maximum signal strength and uptime, every **Resilience** handset comes equipped with its own embedded **Quad-Network Data SIM** (another 123Telecom product from our Kontactable range).

- **Multi-Network Coverage:** Automatically connects to whichever UK mobile network is strongest: **EE, O2, Vodafone, or 3.**
- **Seamless Failover:** Switches provider signals dynamically to maintain uninterrupted call quality.

### Business Continuity for Less Than £4/Month

- **Transparent Billing:** SIM card costs are either included directly in your monthly handset seat charge or clearly itemised on your bill.
- **Exceptional Value:** The unbeatable peace of mind **Resilience** brings, costs **no more than £4/month extra** compared to the same handset without SIM failover capabilities.
